PROFESSIONAL SUMMARY

Software Developer with experience in process automation (RPA), web scraping, and backend/fullstack development. Focused on building scalable automated solutions using Python, improving operational efficiency, integrating systems, and reducing manual workloads. Background in web and e-commerce development (React, Node.js, VTEX), with strong interest in backend engineering, data, and AI-driven solutions.

SKILLS

Backend & Automation: Python, RPA, Web Scraping (Playwright, Selenium), REST APIs, Webhooks, Task Scheduling, Node.js

Databases: PostgreSQL, MySQL, SQLite, Firebase

Frontend & Fullstack: React, Next.js, TypeScript, JavaScript, HTML, CSS, SASS

Mobile: Flutter, Dart

Architecture: Clean Architecture, SOLID, DRY, Clean Code

Tools: Git, GitHub, Jira, Scrum, Kanban

AI Applied: AI tools for productivity and development

PROFESSIONAL EXPERIENCE

Junior Software Developer – Grupo Pinho (CodificaAi) (Apr 2026 – Present)

- Developed RPA solutions using Python
- Built automated pipelines for data processing and integration
- Implemented web scraping with Playwright and Selenium
- Integrated systems via webhooks and REST APIs
- Created scheduled automation jobs
- Worked with PostgreSQL
- Eliminated manual generation of ~300 monthly certificates
- Reduced operational workload and improved efficiency
- Used AI tools to enhance productivity

Software Developer – Quality Digital (Aug 2025 – Apr 2026)

- Developed e-commerce apps with React, Node.js, VTEX
- Worked on international B2B/B2C project
- Integrated REST APIs
- Improved performance and UX
- Wrote unit tests with Jest
- Agile (Scrum/Kanban)

Mobile Developer – Fitmass S.A. (Jul 2024 – Jul 2025)

- Built mobile apps with Flutter
- Integrated REST APIs, GraphQL, Firebase
- Applied Clean Architecture

EDUCATION

Bachelor's Degree in Information Systems – UniCuritiba (Expected 2028)
